The horse show is first-rate—so large that fully fifty horses cannot be accommodated at the Park, and are boarded in town. The Pavilion entries are very few. DOMESTIC NEWS. War of Races in Texas.

Galveston (Tex), September 18th.—The News' Long View, Gregg county, special says: A reign of Long View, Gregg county, special says: A reign of terror prevails in every portion of the county, except, perhaps, Kilgore, from which place there is no report. The excitement is due to a raid upon the whites, supposed to be contemplated by negroes. The white farmers have their wives and children in the houses, and are holding guard over them. In some communities little sleep has been had since Friday nicht, and haggard faces, with looks of determination, are seen everywhere, betokening the extreme physical and mental tension produced by the blood curdling reports brought in by each. Hundreds of countrymen were in Long View yesterday. On returning to their homes they carried all the arms and ammunition obtainable. The whole trouble has arisen from threats and speeches of a few colored persons of bad reputation, whose course is not sanctioned and was not known by the mass of negroes. There are indications that as much fear has been excited among the latter as among the whites. However this may be, the people have been earried to such a pitch of excitement that it is certain should a white person be molested, one of the bloodiest tragedies will be enacted ever known.

New York Republicans. RICHFIELD STRINGS, September 18th.—The attendance upon the Republican State Convention i not so large as usual. The State Committee met a not so large as usual. The State committee met at S o'clock this evening, and was called to order by Chairman John F. Smythe. Upon the roll-call twenty members answered to their names. The Convention adjourned until 10 F M. No programme for organization is yet indicated. The name most canvassed in connection with the temporary Chairmanship is that of Senator Warner Miller. Very little dispositions shown by the prominent Repubmanship is that of Senator Warner Miller. Very little disposition is shown by the prominent Republicans present to discuss the probable action of the Convention. Their purpose seems to be to permit the Convention to take its own course. In reference to the formation of the ticket, the whole drift of sentiment appears to faver nominating the present State officers. Ex Senator Thomas C. Platt telegraphs to-day, canceling his engagement for rooms. Chauncey M. Depew, Whitelaw Reid and George William Curtis are among the prominent delegates. It is expected that a considerable proportion of the New York city delegation will not be present. There is no reason to believe that any strife will arise in the Convention over any point.

[SECOND DISPATCH.] RICHFIELD SPRINGS, September 18th.—The State Committee went into an executive ression at 10 p. m., and took action relative to the organization of the party in New York city, and prepared a report to present to the Convention in regard to contested seats. A Tale of the Seas.

HALIPAX, September 18th.—Captain Alfred Gasston, of the bark Britannia, which was wrecked off the coast Monday last, tells a story of fearful suffering. They were on the wreck from Monday until Tuesday evening, during which time the gale was blowing, and all hands were compelled to remain on deck exposed to the fury of the storm. Finally they took to a small raft. Hardly had the people got on this when a heavy sea washed off all except the Captain and eight men. During the night and the following morning, five others were washed off in a similar manner, leaving only four survivors, who were rescued by a boat from the shore. Thirteen perished, including the wife and children of Captain Gasston. All were natives of England. Two of the Captain's children were picked up, but died in a few minutes, either from fright or exhaustion. The following is a list of the lost: First officer, George Toye; second efficer, Atthur Holmes; steward, name unknown; John Johnson, Lewis Smith, Fred Henderson, Arthur Porthouse, Ernest Moltov, Mrs. Emily Gasston and four children.

THE STATE PRISON MATTER.

The Removed Directors Add to the History of the State Prison Investigations by Addressing a Lengthy and Lively

Open Letter to the Governor. George W. Schell, W. F. McNutt, A. H. Chapman and J. H. Neff, late State Prison Directors, have published an open letter of great length, addressed to Governor Stoneman, in which they take issue with every statement and finding he makes against them. and several times charge the Governor with misrepresenting the testimony and stating as matters of fact things not sustained by the evidence. They point out that the late Democratic Senate refused to confirm a Democrat whom Governor Perkins appointed as Prison Commissioner, and charge that it did so be-cause he was appointed by a Republican Governor. They charge the Governor with being a demagegue in reciting certain correct principles of action, but in failing to be governed by them. As to the charge that the Warden drew and retained a large sum appropriated to psy deficiencies, and only paid the balance over when the investigation was about to begin they say that the same was about to begin, they say that the sum was appropriated by Act of Legislature to discharge all past delinquencies. That such claims were discharged as rapidly as ascertained and audited, and that the sum of \$9,000 remaining over for the time com-plained of, was held to await the decision of eded. It is not possible Chicago will get the Conventional again, because two National Conventions would be held in the same place in succession. The chances are that it will be held in Saratoga, Cincinnati, Philadelphia or at Cape May. All these places seem anxieus to secure it. There is a prejudice against New York city, and it will not be held there."

Syg.000 remaining over for the time complained of, was held to await the decision of the Attorney-General as to the validity of cartain claims made against the fund, and so soon as it was rendered, and the case reported to the Board, it ordered the balance returned to the State Treasury, and it was done, and every cent accounted for, and that while said balance remained on hand it was deposited in the Bank of Nevada to the credit of the State Prisons of California, and that all these facts appeared before the Governor by these facts appeared before the Governor by
the testimony of unimpeached witnesses.
They dony that the water claim preferred to
the Board against the deficiency fund was a
"pretext," but say it was a genuine claim, and
that documentary and oral proof of that fact
was made to the Governor. They challenge
citation of any proof that the Directors were proven that the Directors procured the Warden to waive his right to the appointment or this discharge of subordinates. They charge that it is the Governor traveled outside the record to refer to the Commission appointed by Governor Perkins to inquire into State Prison management, and hold that no proof was taken regarding that Commission, or any "scandal" which it is alleged it unearthed; that out of this ten charges before that Come mission but one was held to be proven, and that was with reference to the charge that the Directors sought to influence the Warden in his appointment of cubordinates; that as to that charge the preponderance of evidence is against it, and it was preferred by a discharged employe; that the charge that there was made up monthly a pay-roll, and money to its full amount drawn, though most of the employes had already been partly paid by orders on the Commissary, even if true, amounts to nothing, because such drafts on the Commissary were always deducted from the employe's due, the balance ascertained, and the money left over was used to discharge legitimate obligations in behalf of the State, and that the sums appeared promptly and fully on the Warden's cash account, and a full account of all the disbursements ap-peared in the quarterly reports; that these facts were proven before the Governor, it being shown that where employes drew supplies from the Commissary, when the money was drawn from the State to pay the employes, the amount paid by supplies was deducted from the salary due, and that sum used to restore the goods so drawn, and that in this process there was no wrong, and that it was safe and preferable to paying the em-ploye in full, and having him then pay the Commissary for his supplies. They deny emphatically that it was proven, or is true in fact, that the Warden and Clerk drew sums of money in excess of salaries, or that any

sums they drew were unaccounted for, or that they ever overdrew their accounts, or improperly drew money of the State, and they charge the Governor, regarding this finding, with misleading the reader. They deny wrong regarding the "yacht-building"

charge, and enter upon an elaborate explana-tion as to that matter by quoting the testi-mony of the Clerk and the Warden. They

Fire in New York.

New York, September 18th.—This evening a fire broke out in the basement of 537 and 559 Broadway. The basement and floor above were occupied by Hellman & Herman, wholesale dealers in fine underwear. The store had been closed up when the fire was discovered. Smoke and flames were first noticed on the Mercer street side. The building has a frontage of 37½ feet, and is 200 feet deep. The flames ascended through the clevator to the top floor, and the efforts of the firemen failed to save the building, which was five stories high. The losses aggregate \$725,000.

THE VIRGINIA DECISION. Judge Bond's recent decision may not be to the general reader perfectly clear, as the reports sent on have not been marked by lucidity. Judge Bond is one of the United States Circuit Judges. In the year 1871 which will be sold at a low price, and upon easy the State of Virginia funded her indebtedterms. The size of hed-plate is 40x60 inches. The ness at about 62½ cents on the dollar, issupurchaser can have his choice of the presses. The ing \$20,000,000 new bonds, with coupons attached receivable for taxes and all demands due the State. In 1882 the Virginia Legislature, in an Act passed, declared that the bonds had been widely counterfeited. It therefore forbade any State officer from sterling, \$4 821@4 86; 103g for 3s, 101 for 5s; silver receiving any coupons on account of the State until the person tendering them should establish, in an action at law, their entire genuineness. While so proving them to be originals, the taxpayer must pay his taxes or dues in money. If he Mining stocks were fairly active in San Francisco secured a verdict in his favor, then his money should be refunded to him. This procedure must be observed every time taxes have to be paid, and as the coupons mature. Of course, such a proceeding had assembled yesterday at Treaton, and nominated the effect of reducing bonds to the lowest figure, and constituted the basis for the charge against the "Old Dominion" of stone at Copenhagen yesterday, on board his steam repudiation. The constitutionality of this Act was brought before the Courts, and finally the Supreme Court of the United States by a majority decision upheld the Act deciding to use the language of the S19-1w* Act, deciding, to use the language of the Act, deciding, to use the language of the Court, that "whether the Tax Collector is bound in law to receive the coupon notwithstanding the legislation which, on its face,

Standing the legislation which, on its face, prohibits him from doing so, was a question not before the Court, and not passed upon by it." This undecided issue, how- able Me ever, was before Judge Bond, who held that the officer designated to receive taxes or other State dues must recognize the tender of coupons of State bonds as a legal mains unchanged, though important results are tender, and that on his refusing to do so, there can be no levy on property for failure to pay taxes. And now that the two decisions are placed side by side in the simplest possible language, it will occur to the reader that the distinction is so fine as An International Convention of Cigarmakers is in to be somewhat obscure to the lay mind. Of course the case will go up to the Supreme Court, and if there affirmed, Vir-

New York, August 1, 1883.

ELLIS SPAVIN CIRE CO.—

Dear Sirs: We were having an occasion to put a valuable horse in condition for a race. In giving the horse this work he threw out a curb, in consequence of which I would have sold bim, at that time, for three bundred dollars (8200) or less. Hearing of Ellis's

months we sold him for as many thousands as we valued him worth hundreds when he had the curb. The horse is at present boarding at our stable and being driven on the road every day. We can safely recommend your Spavin Cure Limment for all bone diseases and callous lumps of any kind, if properly used. Yours, with respect,

For water required for purposes not specified in the ordinance, the rates shall be fixed by the Super-intendent of the Water Works, subject to revision WILL TEST THE LAW .- Yesterday the Board of Trustees, by a unanimous vote, engaged the services of Henry Eggerton to assist the City Attorney in defending the Chinamen who were arrested Monday evening by Constable Harvey for running their license under the city ordinance licensing gaming, and were under the protection of the police. The Trustees are indifferent as to the result

been unable to suppress the same in the least degree for years past. The Mayor says "the gamblers are cutting a stick to break their own heads. We care not which way the suit goes; we have a plain duty to perform, and we will do it without either fear or favor." The Board unanimously agreed with the Mayor, and Trustee Nie sen said: "In this movement nine-tenths of the clitzens of this community are with us." The Mayor added: "I suppose somebody is doing this as a bluff. They think it will cause the oid condition of affairs to be roinstated, but it will not. If a Constable and the Chief's son can walk in and capture a game of tan, they could have done it long ago. I am now convinced that one honest policeman can stop all the games if the people want it done. The ordinance is a sort of compromise, puts gambling out of sight, games if the people want it done. The ordinance is a sort of compromise, puts gambling out of sight, but where gamblers can find it, and pays the city a considerable revenue. I think people who came to the fair this year and saw no gambling went away well pleased, and it will make an increase of 10,000 visitors next year. This move will probably end in stopping all games, and the sooner the better say I."

THE NORTH LEVER-THE CITY BRING ENDAN-RED. -- The Board of Trustees met yesterday afteroon for the purpose of receiving bids for the imvement of the north levee. The American river igh stages causes more or less upeasiness in the ity. The levee on B street, on which is constructed he Central Pacific Railroad, has always been considered high enough and sufficiently strong so long as the main channel or the principal current was kept at a sufficient distance. At the meeting of the Board yesterday three well-known contractors put in bids, accompanied with bonds, to do the work specified for certain amounts. The Board refused to accept any of the bids, and stated that they would receive proposals again to morrow. Immediately after the adjournment of the Board a party started out upon a reconnoitering tour and found what the public least expect, what the authorities should prohibit, and what Mr. Knox, when he was Second Trustee, not only protested against, but prosecuted successfully, procuring the conviction of ten persons for the offense now being committed. The railroad runs out B street. From A to B north, prosecuted successfully, procuring the conviction of ten persons for the offense now being committed. The railroad runs out B street. From A to B north, and in many places from A street half way to the railroad, from Fourteenth to Nineteenth streets, has all been dug out to a depth ranging from eight to fifteen feet. The width of this immense channel is equal to that of the American at ordinary high water, and from appearances is about on a level with the present bed of the river. The cottonwoods and willows have all been cut away, and the protection afforded by the timber entirely removed. This excavation has been done by the sanction of the parties owning the ground. The dirt has been haulel into the city, the teamster paying the proprietor five cents per load therefor. "It seems strange," as a taxpayer remarked yesterday, "that the city will continually tax us for levee purposes, when they at the same time allow others to undo all that has been done for years without a murmur. I when they at the same time allow others to undo all that has been done for years without a murmur. I would not say a word, but these excavators are mere gophers, and must be stopped. The Second Frustee must not allow any man or set of men to indermine our levees." This is a very serious mater, and should receive the attention of the city auchorities to one.

SPECIAL MENTION

OF SOME OF THE REMARKABLE PEAT-URES OF THE STATE FAIR.

Agricultural Machinery Display of D. M. Osborne & Co. by the Granger Association-The Shippee Combined Harvester.

One of the finest displays of agricultural machinery at the State Fair-which has just closed-was that of the Granger's Co operative Business Association of the Sacramento Valley, whose warerooms and place of business are located at the corner of Tenth and K streets, this city. Among the different classes of agricultural implements common to the farm, such as plows, harrows, wagons, buggies, etc., exhibited by this Association, were three machines for harvesting purposes which attracted more critical attention on the part of many farmers than any other agricultural implements displayed during the fair. We refer to the new Osborne No. 11 self-binding harvesting machine, the combined mower and reaper, and the new No. 2 mower. To some these machines were strangers; to many they were not, and those who understood the merits of each spoke only where the grain had fallen to the ground or was standing, they were equal to all requirements, and could do better and more satisfactory work than any other machine made. There is not a graingrowing district on the American continent where nese machines are not in use, and wherever used they always lead, as thousands of testimonials from the most practical farmers will prove. Well may Messrs. Frank P. Lowell, of the Grangers' Association of Sacramento, and J. B. Carrington, the San Francisco representative for D. M. Osborne & Co., feel proud of the laurels they won at the hands of the State Board of uring the winter is a wild stream, and always at its the first premium. Before closing this review, it seems best to present to the reader some of the leading advantages of these machines over others, and show how D. M. Osborne & Co. have labored to meet the requirements of the age and give hest machine that can be made. A few

as the main channel or the principal current was the farmers throughout the country the years ago they were building only front-cut machines; those farmers who preferred rear-cut machines wanted them to be Osberne-built, and hey acceded to the demand. A few years ago they had the best wire-binding harvesting machine in the narket; many farmers who preferred twine to wire insisted upon having Osborne-built twine-binders, and they got them. There is still a large class inisting upon self-binders with compressors, and packers and bundle-sizers and dischargers; but Osborne-built they must be, according to the demand, and Osborne-built they shall be. All these things are possible without being an Appleby. As a matter of fact, the new Osborne Twine-Binder is as much superior to an Appleby binder as the sun is superior to the moon in the light-giving principle The Appleby uses a "tucker," composed of seven ieces, in the tying process; the Osborne dispense with this "tucker" and its seven pieces. The Osborne knife is so constructed that the tucker is useless, and they are enabled to place their knotternooks half an inch closer to the bundle, saving twice that length of twine on every bundle, and binding tighter. Instead of the complicated lunger, bolt and spring, comprising six pieces, for inder-lock, the Osborne uses a simple cam movenent, which is more positive, and a hundred times ess liable to get out of adjustment, and dispenses with six vieces more. Instead of a single bundle trip, the Osborne has a double or packer-trip; that is, the right-hand packer is connected with the rip-rod, so that the binder cannot clog or choke in eavy grain, as machines do which rely only upon the compressor forks for tripping. The new Osborne has a space between the point of the needle and the gearing in front larger by four inches than can be found on any other machine, and consequently in very long grain can bind that much nearer to e of the bundle. No other s mpare with the Osborne No. 11 in the work nanship displayed upon its mechanism, especially all the parts of the binding apparatus. There is a nicety of adjustment and finish about these that re-

ects credit upon the maker, and promises well for the purchaser. With such a large number of pieces ispensed with entirely, thus reducing the binding paratus to a simple automaton, which will re uire no further adjustment after being started, the ew Osborne binder can be operated by any man or boy who can drive a span of horses. The harvester part of the machine is practically the same that hey have used for years; and all who are interested know that there is no better machine anywhere. The next to be considered is the Combined Meader and Mower. The Osborne No. 6 Combined Mower and Self-

and has become sufficiently popular among a classes of farmers, to be considered one of the established institutions of the country. This machine, when set up as a reaper, is much lighter than most of the independent reapers, and the character ground will challenge e mparison with the best of them. Its draft is remarkably light, and it runs without fuss or friction. It is no wonder, then, that their combined machine is so popular with all classes elasticity of the machine, as exemplified by its double-hinge connections. The grain platform is hinged to the frame, and the frame is hinged to the axle, in such a manner that the machine cannot be strained by running ever the roughest of ground. This is an element of strength and durability not possessed by any other combined machine, and it is safe to say that this feature doubles the term of service of a regner or mover. As a sayor of lodged elasticity of the machine, as exemplified by its service of a reaper or mower. As a saver of lodged and down grain, the No 6 has long been famous among farmers. As a mower, the No. 6 is vastly ahead of any other combined machine. It has two drive-wheels, the same as any independent mower and, except that it is somewhat heavier, is fully equal to any of them for all kinds of grass cutting. mower and dropper. Of course it is cheaper than the mower and self-rake reaper, and is well suited to stock farms, etc., where grain is not raised in

large quantities. As a dropper it has the finest reel ever seen on any similar machine. The New No. 2 Mower. nice." Over three fourths of the cigars smoked in this State are made by the Chinese, and every eigar made by them is put in the mouth of the man who puts on the wrapper. A reporter stepped into a cigar manufactory on I street yesterday, where seven men were engaged in making "Havana cigars." Each man, when he needed a little dampness on his tobacco, supplied the same with saliva, and the man who puts on the finishing touches rolls the cigar in his mouth.

This new machine is a light, compact, easily-handled mower, and is warranted to do good anywhere. It has been geared a little higher than last year, so as to give increased cutting power. The gearing is inclosed in an iron box entirely dirt-proof. Wrought and malleable iron and steel are the principal components of this mower. Its draft is light, and its strength and durability can be recognized at a glance. Any person desiring further information with regard to agricultural implements or kardware of any kind, and these machines in particular, will do well to address the Grangers' Co-operative Business Association of the Sacramento Valley, Nos.

1000, 1002, 1004 and 1006 K street, Sacramento city. The Shippee Courbined Harvester. The Shippee Combined Harvester, manufacture by L. U. Shippee & Co., of Stockton, is the latest of the machines of its class to demonstrate it; success in this State, and it has characteristics of its own which promise to make it very popular. The mahine is based upon patents obtained by Mr. Parish, of Oregon, which, it is reported, were purchased by U. Shippee & Co. for \$20,000. When known as the Parish Harvester, it had the reputation of doing ood work in Oregon. When it was put to work in San Joaquin county, there was difficulty in securing atisfactory work from it, and improvements were troduced by Messrs. Shippee and Grattan, which nounted almost to a remodeling of the machine in some respects. During the introduction of these improvements there were the disappointments usual to such efforts, and those who are usually ready to prophesy failure were not absent. The present owners of the machine persisted, however, until they have now secured results which commend themselves to all skilled observers. A reporter

cases." A reporter met A. L. Hart, of counsel for Hurtado, last evening, and esked him if his client would be hanged on the 28th instant. His reply was, "I hardly think so." He had nothing further to say, but it is presumed that the matter will be taken to the Supreme Court of the United States on a writ of error, as was stated the day Hurtado was sentenced.

saw, because it is somewhat startling to find a machine taking an 11-foot cut in the grain, thrashing, cleaning and saving, all with two men and ten horses; that it is able to do so much with such a com paratively small force of men and animals, is n doubt owing to the close and perfect combination and adjustment of the parts in the Shippee machine. There seems to be no unnecessary moving of the grain : it goes directly from one part of the machine to another and out into the sack with the least possible power required to handle it. The team, therefore, has not to push a lot of dead weight around the field. W. D. Bugbee, City Weigher of Stockton, gives a certificate that the machine weight but 3,925 pounds. In the Shippee machine the header, separator and cleaner are more closely inter woven than in any device of the kind we have seen.'
The committee appointed by the State Agricult ural Society to pass upon awards in this class of ma chinery reported as follows:

To the State Board of Agriculture: We, th undersigned committee, appointed by your Board to visit San Joaquin county and examine the working of the various combined headers and thrashers, in the highest terms. There was no divi- have performed that duty, and after a careful exsion of opinion; each agreed that for amination of the different machines running in the all classes of work for which these machines are fields-some four or five in number-we are of the adapted, whether on even or rough ground, or opinion that the combined machine known as the Shippee machine is the most complete, perfect and econom'cal of all the machines that we have exam ined; that it is one of the greatest inventions o the age; that it will revolutionize the manner of thrashing, and will reduce the cost of harvesting and thrashing to a very low figure, not much ex ceeding two cents per bushel, and that said machin is entitled to the premium offered by your Board.

The following indorsement speaks for itself: We, the undersigned, have seen the combined ha vester above described, known as the "Shippe Harvester," built at Stockton, with Shippee & Gra Agriculture for their new self-binding harvester tan improvements, working in the field. It does and combined mower and reaper, which carried off first-class work—cutting, thrashing, cleaning, sack ing, and saving the grain. The machine is elever foot cut, and was worked by two men and ten horse It was taking a full cut in a field yielding from twenty to thirty-five bushels of wheat per acre. We recommend it to the farming community and publi gith pleasure as being a wonderful labor-saving m hine, as also saving much more grain than by head ng and thrashing separately.

many years ago, and it is as true to-day as many years ago, and it is as true to-day as then. The poor victim of Blood Disease is drugged with Mercury to cure the rulady, and then dosed with lodides to cure him of the Mercurial Poisoning; but instead of any relief, the first breaks down his general health and makes him a cripple, and the other rules his digestive organs. To those afflicted in this way Swift's Specific is the greatest hope of earth and in worth more afficted in this way Switt's Specific is the greatest boon on earth, and is worth more than its weight in gold. It antidotes this Mercarial Poison, tones up the system, and brings the sufferer back to health and happiness. Every person who has ever been saivated should by all means take a thorough course of this remedy.
